Amendments to the Specification

Please replace the current paragraph in the application on page 12, paragraph [0071], with the following paragraph:

FIG. 7B illustrates MMCEL 700 with initial programming such that ladder 702 is coupled to power (VDD) at M1 and ladder ~~702~~ 704 is coupled to ground (GND) at M1. Coupling ladder 702 to power and ladder 704 to ground produces a logic 1 and a logic 0 output, respectively. The MMCEL output RevID<0> can be selected at either output.
